

23c-200-1-3

Production according to TR 3740-002-15365247-2004

- Pipeline connection:** welded connection.
Climatic version: У, УХЛ, ХЛ, Т according to GOST 15150-69.
Placement category: 3, 4, 5 according to GOST 15150-69.
 Installation position on the pipeline: horizontal, vertical.
 Working medium supply direction: to the seat.
 According to the arrow on the body.
Gate sealability: class IV GOST 9544-2015.
The control is carried out through:
 ☒ built-in electric actuators of single-turn electric flanged actuator (МЭОФ) type manufactured by ABS ZEIM Automation, OJSC, Cheboksary;
 ☒ electric actuators of other manufacturers with standard connection units.

Specifications

Legend

DN - Nominal Diameter	T_{max} - Maximum Design Temperature	h - Valve Stroke
PN - Nominal Pressure	M_{кп} - Spindle Torque	K_v - Throughput Capability
P - Pressure	t - Response time	F - Seat Area
	μ - Fluid Flow Coefficient	ζ - Resistance Coefficient

The pressure-compensated control disc valves DN 80-200 of type 23c are intended for the control of the working medium flow or pressure.

The medium flow through the valve is regulated by means of changing the area of passage section, which is achieved when turning the spool with regard to the seat.

They are not used as shutoff devices.
