

14c-76-25Э

Production according to TR 3740-002-15365247-2004

Pipeline connection: welded connection.
 Climatic version: У, УХЛ, ХЛ, Т according to GOST 15150-69.
 Placement category: 2, 3 according to GOST 15150-69.
 Depending on the lifting height of the spool, the throughput capability is shown in the diagram 26.

Legend

DN - Nominal
Diameter
PN - Nominal
Pressure
P - Pressure

Tmax - Maximum
Design Temperature
Mкр - Spindle Torque
t - Response time
μ - Fluid Flow Coefficient

h - Valve Stroke
Kv - Throughput Capability
F - Seat Area
ζ - Resistance Coefficient

The double seat control valves of type 14c are intended for the control of the working medium flow or pressure. The control is carried out with the help of changing the passage area by means of translational movement of the double seat spool. They are not used as shutoff devices.

The control of the control valves of type 14c is carried out with the help of a multi-turn built-in electric actuator with a current position sensor of the following types:

- ПЭМ-Б2У (ABS ZEIM Automation);
- SAR (AUMA);
- upon the customer's demand.
