

# 12c-1

**Pipeline connection:** welded connection.

The maximum pressure differential on the valve is limited.

**Installation position:** on horizontal and vertical pipeline sections.

**Climatic version:** У, УХЛ, ХЛ, Т according to GOST 15150-69.

**Placement category:** 2, 3 according to GOST 15150-69.

**The valves are controlled** through a quarter-turn actuator with a current position sensor of single-turn electric actuator (MЭO) and single-turn electric flanged actuator (MЭOФ) types (ABS ZEIM Automation, OJSC, Cheboksary) etc.

**The control valves with butterfly dampers of type 12c are intended for the flow control of water steam, gas and air.**

The control is carried out by means of changing the area of passage section between the body and the butterfly damper when turning it. The full opening of the valve corresponds to the lever turning by an angle of 75 from the closed position.
