

# 1087-100-ЭЧ

Production according to TR 3740-002-15365247-2004

**Installation position:** on horizontal and vertical pipeline sections with the medium direction from the top downward.

**Pipeline connection:** welded connection.

**Climatic version:** У, УХЛ, ХЛ, Т according to GOST 15150-69.

**Placement category:** 2, 3 according to GOST 15150-69. The valve control is carried out with the help of multi-turn built-in electric actuators with a current position sensor.

## Specifications

### Legend

**DN** - Nominal Diameter

**PN** - Nominal Pressure

**Tmax** - Maximum

Design Temperature

**Мкр** - Spindle Torque

**t** - Response time

**h** - Valve Stroke

**Kv** - Throughput Capability

**F** - Seat Area

**ζ** - Resistance Coefficient

**P** - Pressure

**$\mu$**  - Fluid Flow Coefficient

The slide control valves are used at heat power engineering sites for the control of the working medium flow or pressure. The control is performed by means of changing the passage area, which is achieved through translational movement of the slide gate.

The maximum pressure differential on the valve is limited.
