

Production according to TR 2913-001-15365247-2004

**Pipeline connection:** welded connection. Climatic version: У, УХЛ, ХЛ, Т according to GOST 15150-69. **Placement category:** 1, 2, 3 according to GOST 15150-69.

The valve control is carried out with the help of the following actuators:

- a single-turn electric actuator (M3O) through the lever;
- multi-turn built-in electric actuators with a current position sensor of single-turn electric flanged actuator (ΠЭΜ) type (ABS ZEIM Automation), SAR (AUMA);
- actuators of other manufacturers with standard connection units.

## **Specifications**

## Legend

**DN** - Nominal Diameter **PN** - Nominal Pressure **P** - Pressure Tmax - Maximum Design Temperature Μκp - Spindle Torque t - Response time μ - Fluid Flow Coefficient

h - Valve Stroke
Kv - Throughput Capability
F - Seat Area
ζ - Resistance Coefficient

The special control valves of type 18c are used as controlled throttle units of FRPRDS and PRDS, as well as for the control

of the working medium pressure in steam and water pipelines.

## Structural designs:

- globe control valves;
- control valves.

The valves are designed and manufactured considering specific requirements of the customer to order.
