

863-150/350-Ш

Production according to TR 3113-003-15365247-2009

They are directly installed behind the globe and throttle valves of PRS, PRDS and FRPRDS on vertical and horizontal pipeline sections.

Working medium flow direction: from a branch pipe of lesser diameter to a larger one.

Body material:

– steel 12X1MΦ or 15X1M1Φ at the temperatures over 450 °C;

– steel 20, 09Г2С or 15ГС at the temperatures under 450 °C.

Pipeline connection: welded connection.

Legend

S₁, S₂, S₃, S₄, S₅, S₆ - Gird Passage Area, cm²

The throttle devices of series 863, 865, 891, 950, 1040, 1041 are used as uncontrolled throttling elements of PRS, PRDS and FRPRDS.

The throttle devices DN 100/200 of series 1040 and 1041 are respectively included into the composition of steam-generating plants УПГ 50/60 and УПГ 60/160.

The table demonstrates typical throttle devices. However, the majority of throttle devices is individually designed for specific operation conditions.
